To Whom It May Concern:

I have known Michael Rosenfield for more than twenty years of which a great part of that time he has been involved in the field of education. He has taught several different grades and subjects both in private and public settings as well as tutoring privately and for agencies. He has always been very dedicated to his students and concerned that he provide them with the best possible educational experience. Michael truly enjoys working with students and being a part of their educational process.

Michael is also very honest, hardworking and has integrity.

Sincerely,

Curtis W. Barnes
